FRASETIA ADI KUSUMA

INFORMATICS & COMPUTER ENGINEERING

+62 857-6481-1568 | fak.addikus@gmail.com

PROFESSIONAL SUMMARY

A graduate of Informatics and Computer Engineering Education from Universitas Negeri Jakarta, specializing in Data Analytics and Web Application Development. Experienced as an Admin Freelance, responsible for processing invoices, inventory management, and Supply Chain Management (SCM) workflows. Experienced in education as an AI and Informatics Extracurricular Teacher at SMA Labschool Cibubur. Thesis research in Machine Learning and Natural Language Processing (NLP) focusing on aspect-based sentiment analysis of online loans. Committed to leveraging a combination of data analytics skills, business operational understanding, and software engineering to deliver impactful solutions.

SKILLS

Tech and Design: Python | Java | SQL | UI/UX Design | Microsoft Office | Tableau | Power BI

Specialization : Data Science | Machine Learning | Deep Learning | NLP | Computer Vision | Database | Financial Planning | Budgeting | Cash Flow Management | Inventory Control | Audio Production

EDUCATION

Universitas Negeri Jakarta - Bachelor of Information and Computer Engineering Education **2022 - 2026**

- **GPA:** 3.71 / 4.00
- **Relevant Coursework:** Algorithms, Data Science, Web Development, Database Systems, Education Pedagogy, Machine Learning, AI, Deep Learning & Computer Vision

WORK EXPERIENCE

SMA Labschool Cibubur - AI & Informatics Extracurricular Teacher (Part Time) **Jan 2026 – Jun 2026**

Led and mentored a cohort of 15+ high school students in foundational computer science and artificial intelligence concepts.

- Guided students in building personal web portfolios using HTML5 and CSS3 to showcase their digital projects.
- Enabling students to develop interactive image detection models using Scratch and block-based machine learning tools.
- Designed a project-based learning that integrated computational thinking with practical software design for extracurricular activities.

SMA Negeri 53 Jakarta - Informatics Teacher (PKM) **Jul 2025 – Dec 2025**

A prominent state secondary school in Jakarta committed to delivering high-quality education and fostering digital literacy among students.

- Designed and delivered comprehensive Informatics lesson plans focusing on digital literacy and computational thinking.
- Managed classroom activities and assessed student performance through practical assignments and examinations.
- Integrated interactive technology into the learning process to increase student engagement and understanding.

Badan Pengembangan dan Pembinaan Bahasa - Tim Kerja Pembinaan Bahasa dan Hukum (Intern) **Mar 2025 – Jul 2025**

The national institution responsible for language development and the regulation of language authority between central and regional levels.

- Designed high-fidelity prototypes for the "Halo Bahasa" application using Figma, focusing on UI/UX.
- Created visual assets for the Festival Musikalisasi Puisi Nasional 2025 and designed technical guide covers.
- Served as the primary minute-taker for departmental meetings, ensuring accurate documentation of decisions.

PROJECTS

ERAFEST - Finance **2023 – 2024**

An annual flagship event organized by Educational Radio FM UNJ, featuring music and art festivals to foster student creativity and engagement.

- Managed and supervised the cash flow for large-scale campus events including ERAFEST 2024, 2023, and Harmonity.
- Formulated budget plans, monitored operational expenses, and generated accurate financial accountability reports.

LEADERSHIP & ORGANIZATION

Educational Radio FM (ERA FM) UNJ - Head of Audio Production **2025 – 2026**

A student-led educational radio station providing a platform for digital audio content and broadcast skill development.

- Led the audio production division, overseeing the creation of bumpers, jingles, and podcast episodes.
- Served as the technical operator for podcast tapings and edited audio content for broadcast standards.
